

Allen McCalister
Director of Workers Compensation Cost Containment
Travelers Risk Control

Allen McCalister has served in various capacities within Risk Control during his 30 plus years with the Travelers. As the Director of Workers Compensation Cost Containment Risk Control, his group's primary focus has been on reducing client's Workers' Compensation insurance cost through the development of loss reduction customer service strategies across all of Travelers book of business. Allen conducts various Travelers Safety Management Seminars nationally and his team provides consulting risk control services to the Travelers major clients throughout the country. Additionally, he is responsible for the continued development and delivery of resources and services for our customers, brokers, agents and business unit partners.

Prior to joining the Travelers, Allen McCalister worked with the Educational Computer Company, a military contractor that designed, developed and manufactured aircraft simulators for the armed forces. He was part of the company's Prototype Development Team involved in the concept, design, manufacturing and delivery of the company's first fully integrated 3D fly by wire aircraft simulator. Other project work included: The Cobra Helicopter, F-15 & F-16 jet fighters, The Bradley fighting Vehicle and the Polaris fighter.

Allen's undergraduate studies were in Aerospace Engineering and Mathematics at the University of Florida and Florida State University.
