Drew Woods

Drew Woods is Vice President of Personal Insurance Research & Development for Travelers. In this role, he leads the analytics teams responsible for developing models that support various aspects of the business, including auto and homeowners insurance pricing, marketing, client retention, sales and service.

Before joining Travelers in 2003, Woods worked in the predictive analytics group at Allstate.

He serves on the Boards of Directors for the Highway Loss Data Institute, where he is the Chair of the Board, and the Insurance Institute for Highway Safety.

Woods received undergraduate and master's degrees from Mississippi State University and holds a Ph.D. in mathematical sciences from Northern Illinois University.
