

**DANNY DUNN, CISSP/CSSA
U.S. DEPARTMENT OF
HOMELAND SECURITY**

**CYBERSECURITY ADVISOR
CYBERSECURITY & INFRASTRUCTURE
SECURITY AGENCY**

Danny Dunn is currently a Cybersecurity Advisor with the Cybersecurity & Infrastructure Security Agency (CISA) for the state of Idaho. He has over 30 years of Information Technology (IT) experience within the private sector and federal civilian workforce. Over 22 years of his IT experience has been dedicated to cybersecurity and ranges from the hardening of critical infrastructure systems to auditing them per NIST, Department of Defense, and industry standards. Prior to coming to CISA, Mr. Dunn served as a Department of Defense (DoD) Security Control Assessor-Validator (SCA-V) and was responsible for ensuring our nation's critical Army and Army Corps of Engineers systems' cybersecurity postures were up to published regulatory standards while they remain in operation. His current roll with CISA allows him to utilize his experience to advise Idaho's private and industry partners in their efforts to thwart the ongoing onslaught of cyber threats on our nation's critical infrastructure and ensure they are resilient to these attacks going forward.
