

PREVENTING ELECTRICAL FIRES

Electrical fires are one of the most common forms of workplace fires. Your organisation can help prevent them by carrying out simple precautions in your business, getting specialist advice and ensuring that you carry out regular maintenance and inspection on your electrical installation and portable equipment. The facts about workplace fires...

15,547 fires 

were reported in workplace buildings for 2013-14, **accidental fires** account for **75% of the total fires**¹

 **19%**

of **accidental fires** were caused by faulty appliances and leads.

1,604

of those fires resulted from a **misuse of equipment**¹
