

Rehman Khan is a cybersecurity professional with extensive global exposure and experience. In his 18+ years in the security industry, Rehman has overseen multiple high-profile mergers and acquisitions, has stood up several information security programs, and played a vital role in designing the security architecture responsible for protecting the U.S Air Force's aerial assets, including F-15 fighters.

In his current role as an Assistant Vice President on the Cyber Risk Control Team at Travelers, Rehman is responsible for evaluating the security programs of existing policy holders and new business prospects, and ensuring the establishment of resilient security measures. Rehman's areas of interest include industrial security controls, security regulations, and optimization of security technology.
