Strategic Report of the Directors

The Directors of Travelers Insurance Company Limited (the “Company”) present their strategic report for the year ended 31 December 2018.

Principal activity

The principal activity of the Company is the transaction of commercial lines general insurance business in the UK and Ireland.

Overview

Travelers Insurance Company Limited reported a profit of £4.1m in 2018 (2017 £21.7m) and a 106.4% combined ratio (2017 97.1%). The deterioration in the combined ratio reflects a reduced level of favourable prior year reserve development and a greater severity and frequency of large property losses in 2018. Excluding prior year reserve development the combined ratio was 108.3% (2017 101.4%), reflecting net claims reserve releases of £4.1m (2017 £8.7m).

Financial results

Gross written premiums increased by 17.1% to £269.6m (2017 £230.3m). The middle market and professional risks business units both grew strongly with renewal retention and new business both higher than in 2017. Total growth was flattered by the transfer in of £9.1m of solicitors business written in the group’s Syndicate in 2017.

A continued focus on expense management has led to a further reduction in operating expenses and contributed to lowering the expense ratio by 1.9 points to 43.6% (2017 45.5%).

The investment return deteriorated to £16.5m (2017 £19.1m), reflecting a higher level of realised investment losses than in the prior year, as well as lower yields on the bonds held. We continue to invest in high quality corporate and government bonds with an average credit quality of AA (2017 AA). We expect low investment returns to persist for the foreseeable future, which underlines the importance of increasing underwriting profits to achieve our target level of returns. Investments under management totalled £1.10bn (2017 £1.07bn).

Trading environment

The trading environment remained demanding. We achieved positive rate change, which was more or less in line with our estimate of claims inflation. Our focus continues to be on improving the Company’s underwriting profitability through actively managing the mix of the portfolio we write towards the higher margin sectors and products. This will involve taking appropriate underwriting and pricing actions to achieve our profitability targets on those portfolios not currently delivering the required level of return and focusing our sales efforts on growing those lines where we are currently achieving appropriate returns.

Capital management

The Company’s financial strength remains strong with net assets improving during the year to £465.2m (2017 £445.5m). During the year the Company’s financial strength rating from AM Best was upgraded from A (excellent) to A++ (superior). As of 16 April 2019 the Company’s financial strength ratings are A++ (superior) from AM Best and AA from Standard and Poor’s.

During the year a capital injection of £29m was received from the Company’s parent, The Travelers Companies, Inc. in return for the issuance of new shares, to support investment in its new Irish subsidiary, Travelers Insurance Designated Activity Company (“TIDAC”).

During 2018 the Company did not pay a dividend (2017 £nil).

Brexit

The Company trades in Europe through its branch in Ireland and by writing business on a freedom of services basis to support its UK and Ireland insureds’ exposures in the European Union (“EU”). Approximately 14% of the Company’s gross written premiums are written in the EU excluding the UK, the majority of which is written through its branch in Ireland. In December 2017 we announced our intention to establish a new subsidiary in Ireland, subject to receiving all necessary regulatory approvals.

This new subsidiary, TIDAC, received its authorisation from the Central Bank of Ireland, the insurance regulatory authority, on the 28 January 2019. TIDAC is a wholly owned subsidiary of the Company. Prior to the year end the Company made a capital injection into TIDAC of £5.4m in return for the issuance of 6,000,000 new €1 ordinary shares. Subsequent to the year end, on 11 February 2019, the Company made a further capital injection of £26.5m into TIDAC in return for the issuance of 29,000,000 new €1 ordinary shares.

Post balance sheet event

On 28 February 2019 all of the business of Travelers Casualty and Surety Company of Europe Limited was transferred to the Company via a business transfer scheme under Part VII of the Financial Services and Markets Act 2000. The business transferred is 100% reinsured with other Travelers group companies. The gross reserves transferred amounted to \$59.7m.

Key Performance Indicators (KPIs)

The KPIs the Directors use to manage the business are discussed in the Financial Results section of the Strategic Report above.

Strategic Report of the Directors *continued*

Principal Risks and Uncertainties

The Board sets the risk appetite and reviews it on a formal basis annually as part of the business planning process. It reviews it on an ongoing basis as part of its regular business review processes. The Company has a Board Risk and Remuneration Committee and an Executive Risk Committee which meet regularly to review and update risks and issues arising from the risk register and to monitor performance against risk appetite using a series of key risk indicators. The principal risks and uncertainties facing the Company are as set out below.

Insurance Risk

Insurance risk relates to underwriting, claims management and the risk that arises from the inherent uncertainties as to the occurrence, amount and timing of insurance liabilities.

The Company manages insurance risk by setting an appetite annually through the business planning process, which sets down targets for underwriting volumes, pricing sufficiency and retentions by class of business. Management monitors performance against the business plan throughout the year. The Company uses catastrophe modelling software to model maximum probable loss from catastrophe exposed business. Reserve adequacy is monitored through quarterly internal actuarial review. The Underwriting Committee oversees underwriting risk and the Finance Committee oversees reserving risk.

Credit Risk

The primary source for credit risk arises from the risk of default by one or more of the Company's reinsurers or investment counterparties. The Company operates a rigorous policy for the selection of reinsurers and managing the quantum of exposure ceded to an individual reinsurer. The Company has a conservative appetite to investment counterparty credit risk. Exposures to individual counterparties are monitored against agreed limits and the overall investment portfolio has an average credit quality of AA. The Finance Committee oversees this risk type.

Market Risk

The primary source of market risk is the risk of adverse movements in net assets due to movements in interest rates, currency rates and the market value of securities. Market risk exposures are monitored through the Finance Committee.

Operational Risk

The primary source of operational risk is the failure of people, processes or systems. These risks are managed through well documented policies and procedures, sound internal control processes and business continuity management procedures. Operational risks are monitored by the Executive Risk Committee.

Regulatory Risk

Regulatory risk comprises the failure to comply with relevant regulations and laws. During the year the Company was in full compliance with the capital requirements imposed by its regulator, the Prudential Regulation Authority. There were no changes in the Company's approach to capital risk management during the current or prior year. The Company is continuing to be in full compliance with its regulatory capital requirements under the Solvency II regime.

Conduct Risk

Conduct risk is the risk that the Company (or its agents) will fail to pay due regard to the interests of its customers or will fail to treat them fairly at all times. Conduct risk exposures are monitored through the Executive Risk Committee.

Liquidity Risk

Liquidity risk is the risk that the Company is unable to meet operational cash flow requirements. Liquidity risk is monitored through the Finance Committee.

On behalf of the Board

Matthew Wilson

Chief Executive Officer

Travelers Insurance Company Limited

16 April 2019

Directors' Report

The Directors present their annual report together with the financial statements for the 12 months ended 31st December 2018.

Principal activity

The principal activity of the Company is contained within the Strategic Report.

Business Review

An analysis of the performance of the Company is contained within the Strategic Report and the results for the financial year are set out on pages 7 and 8.

Directors and directors' interests

All the directors set out on page 2 served throughout the year with the exception of Maria Olivo who was appointed on 7 March 2019.

Disclosure of information to the auditors

The directors who held office at the date of approval of this Directors' Report confirm that, so far as they are aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the steps that ought to have been taken as a director to be aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Audit Committee

The Board has an established Audit Committee (the "Committee"). The Committee meets at least three times a year. The Committee comprises the independent non-executive directors. Mr Coughlan was Chairman of the Audit Committee during the year. The Committee's terms of reference require it to take an independent view of the Company's external financial reporting, accounting policies and practices. It considers the appointment and fees, both audit and non-audit, of the external auditors. The Committee also reviews the annual plans of both the external and internal auditors and reviews reports received from both in respect of their findings. The Chief Financial Officer, Head of Internal Audit and the Company Secretary usually attend the Committee meetings. At least once a year the Committee meets, both on its own and with the external auditors, without executive management being present.

Going Concern

The Company has considerable financial resources together with prudent investment guidelines, a high quality of invested assets, sound underwriting procedures, strong controls and risk mitigation processes, (including, but not limited to, reinsurance) and the support of a financially strong parent company. As a consequence, the Directors believe that the Company is well placed to manage its business risks successfully. The Directors are confident that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual financial statements.

Indemnity insurance

The Directors benefited from qualifying third party indemnity provisions in place during the financial year and as at the date of this report.

Supplier payment policies

All third party supplier invoices are settled on the Company's behalf by Travelers Management Limited, an affiliate of the Company. The average payment terms are disclosed in that Company's accounts. The Company also has a management agreement with Travelers Management Limited, who employs the Company's personnel. The employment policies are also disclosed in that Company's accounts.

Environment

The Company does not have a major direct environmental impact as it operates in a service based, non-manufacturing industry. However, it is aware of its environmental responsibilities. The Company has invested substantial sums towards making its systems and processes paperless and recycling facilities are available for all office waste.

Political contributions

Political contributions were nil during 2018 (2017 £nil).

Reappointment of Auditors

Pursuant to section 487 of the Companies Act 2006 the auditors will be deemed to have been reappointed and KPMG LLP will therefore continue in office.

Directors' Report *continued*

Statement of Directors' responsibilities in respect of the Strategic Report, the Directors' Report and the financial statements

The Directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice) including FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis, unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Mike Gent

Chief Financial Officer

16 April 2019

Travelers Insurance Company Limited

Registered in England No 1034343

Notes to the Financial Statements

1 Basis of preparation

Travelers Insurance Company Limited (“the Company”) is a limited liability company incorporated in England. Its registered office is at 23-27 Alie Street, London E1 8DS. The financial statements of the Company have been prepared in accordance with the provisions of section 396 of the Companies Act 2006, including applying the requirements set out in Schedule 3 of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 relating to insurance companies. The Company’s financial statements have been prepared in compliance with Financial Reporting Standard 102 - “The Financial Reporting Standard applicable in the UK and Republic of Ireland” (“FRS 102”), as issued in September 2015, and Financial Reporting Standard 103 - “Insurance contracts” (“FRS 103”), as issued in March 2014.

The financial statements have been prepared on the historical cost basis, except for financial assets available for sale that are measured at fair value.

The financial statements of the Company were approved for issue by the Board of Directors on 16 April 2019. The financial statements have been prepared in accordance with applicable accounting standards. The financial statements have been presented in Sterling, rounded to the nearest thousand pounds.

The Company is exempt by virtue of s401 of the Companies Act 2006 from the requirement to prepare group financial statements. These financial statements present information about the Company as an individual undertaking and not about its group.

The Company’s ultimate parent undertaking, The Travelers Companies, Inc. (“TRV”) includes the Company in its consolidated financial statements. The consolidated financial statements of TRV are prepared in accordance with U.S. Generally Accepted Accounting Principles (“U.S. GAAP”), as promulgated by the Financial Accounting Standards Board (FASB), subject to the accounting-related rules and interpretations of the Securities and Exchange Commission (“SEC”). The TRV consolidated financial statements are available to the public and may be obtained from this Company’s registered address.

Consideration was given to the Application Guidance for FRS 100 in preparing these financial statements. The Company is considered to be a qualifying entity and has applied the exemptions available under FRS 102 in respect of the following disclosures:

- Reconciliation of the number of shares outstanding from the beginning to the end of the period;
- Cash flow statement and related notes; and
- Key management personnel compensation.

The Company has considerable financial resources together with prudent investment guidelines, a high quality of invested assets, sound underwriting procedures, strong controls and risk mitigation processes (including, but not limited to, reinsurance) and the support of a financially strong parent company. As a consequence, the Directors believe that the Company is well placed to manage its business risks successfully. The Directors are confident that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual financial statements.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

Notes to the Financial Statements *continued*

2 Significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. The most critical individual components of these financial statements that involve the highest degree of judgement or most significant assumptions and estimations are set out in note 3 below.

Basis of accounting for underwriting activities

All classes of business are accounted for on an annual basis.

Gross written premiums

Under the annual basis of accounting, written premiums, gross of commission payable to intermediaries, comprise the premiums on contracts entered into during a financial year, regardless of whether such amounts may relate in part to a later financial year, exclusive of taxes and duties levied on premiums.

Premiums written include estimates for pipeline premiums (premiums written but not reported to the business by the balance sheet date) and adjustments to premiums written in prior accounting periods.

Unearned premiums

The provision for unearned premiums comprises the amount representing that part of gross premiums written which is estimated to be earned in subsequent financial years, computed separately for each insurance contract using the daily pro-rata method, adjusted if necessary to take into account the risk profile of the contract. The reinsurance share of unearned premium is calculated with reference to the risk profile of the individual reinsurance contracts.

Acquisition costs

Acquisition costs comprise the expenses of acquiring the insurance policies written during the financial year. Acquisition costs are charged to the accounting periods in which the related premiums are earned. Deferred acquisition costs represent the proportion of acquisition costs incurred which corresponds to the proportion of gross premiums written which are unearned at the balance sheet date.

Classification of insurance contracts

An insurance contract is one under which the Company has accepted significant insurance risk from the policyholder by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder. These contracts remain in force until all rights and obligations are extinguished or expire.

Claims incurred

Claims incurred include all claims and claim settlement expense payments made in respect of the financial year, and the movement in the provision for outstanding claims and settlement expenses, including the claims incurred but not reported provision, during the year.

Claims outstanding

The provision for outstanding claims represents the Company's estimate of the ultimate cost of settling claims that have occurred by the balance sheet date but not yet been finally settled.

In addition to the inherent uncertainty of having to forecast the ultimate costs of those claims that have occurred but not yet been advised to the Company as at the balance sheet date, there is also the considerable uncertainty regarding the eventual final costs of the claims that have been reported by the balance sheet date but which remain unsettled. As a consequence of these uncertainties the Company has to apply sophisticated estimation techniques to determine the appropriate level of claims provisions.

In overview, claims provisions are determined based upon prior claims experience, knowledge of market conditions and trends, and the terms and conditions of the underlying policies of insurance.

Notes to the Financial Statements *continued*

2 Significant accounting policies *continued*

Claims outstanding *continued*

A variety of different statistical techniques are used by the Company's in-house actuaries to determine the appropriate level of claims provision to carry. These methods include the following:

- Chain ladder development of paid and incurred claims, where claims to date for each accident year are extrapolated based upon the historical development patterns of earlier years;
- Estimates based upon the projection of claims' numbers and average costs;
- Expected loss ratios;
- Bornhuetter Ferguson method, which combines use of expected loss ratios, for the more recent and underdeveloped accident years, and the chain ladder projection of incurred claims data for earlier years.

All projections are carried out separately for each country, product, line of business and separately on a gross and ceded basis.

Large claims are identified and reserved for separately.

Where possible, the Company adopts multiple techniques to estimate the required level of claims provision. This assists in giving a greater understanding of the trends inherent in the data being projected and setting the range of possible outcomes. The most appropriate estimation technique is then selected taking into account the characteristics of the business class under consideration.

In arriving at the level of claims provisions, a margin is carried over and above the actuarial best estimate so that no adverse run-off deviation is envisaged.

Establishing an appropriate level of claims provision is inherently uncertain. The degree of uncertainty will vary by product and line of business according to the characteristics of the insured risk. The level of uncertainty is also influenced by a number of factors such as claims cost inflation, judicial trends and legislative changes. As a consequence of this uncertainty the eventual cost of settling outstanding claims can vary substantially from the initial estimates.

Reinsurance ceded

Premiums payable in respect of reinsurance ceded are recognised in the period in which the underlying reinsurance contract incepts. Premiums are expensed over the period of the underlying reinsurance contract. A reinsurance asset is recognised to reflect the amount estimated to be recoverable under the reinsurance contracts in respect of the gross provision for losses reported under insurance contract liabilities. The amount recoverable is reduced where there is an event after the initial recognition that provides objective evidence that the Company may not receive all amounts due under the reinsurance contract. If there is such objective evidence the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises the impairment loss in the profit and loss account.

Unexpired risks

Provision is made for unexpired risks where the claims and administrative expenses likely to arise after the end of the financial year in respect of contracts concluded before that date are expected to exceed the unearned premiums provision in relation to such policies after deduction of any acquisition costs deferred. Provision for unexpired risks is calculated after taking into account relevant investment income. Unexpired risk surpluses and deficits are aggregated where the business classes are managed together.

Investments in subsidiaries

Investments in subsidiaries are measured at cost less accumulated impairment.

Notes to the Financial Statements *continued*

2 Significant accounting policies *continued*

Financial assets and liabilities

In applying FRS 102, the Company has chosen to apply the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement (as adopted for use in the EU).

Classification

The accounting classification of financial assets and liabilities determines the way in which they are measured and changes in those values are presented in the Statement of Profit and Loss or the Statement of Comprehensive Income. Financial assets and liabilities are classified on their initial recognition. Subsequent reclassifications are permitted only in restricted circumstances.

Debt and other fixed-income securities are designated as available-for-sale and initially recognised at fair value plus any directly attributable transaction costs. After initial measurement these assets are subsequently measured at fair value.

Interest earned whilst holding available-for-sale financial assets is reported as interest income. Fair value changes, including foreign exchange gains or losses, are recognised in other comprehensive income and accumulated in the revaluation reserve.

If an available-for-sale investment is sold or impaired, the cumulative gain or loss accumulated in the revaluation reserve is reclassified to profit or loss. Impairment losses on available-for-sale financial assets are recognised by reclassifying the losses accumulated in the revaluation reserve to profit or loss. The cumulative loss that is reclassified from other comprehensive income to profit or loss is the difference between the acquisition cost, net of any principal repayment, and the current fair value, less any impairment loss recognised previously in profit or loss.

If, in a subsequent period, the fair value of an impaired available-for-sale debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss and otherwise it is reversed through other comprehensive income.

Deposits with credit institutions, debtors and accrued interest are classified as loans and receivables.

Recognition

Financial assets are recognised when the Company becomes a party to the contractual provisions of the asset. Financial assets are derecognised if the Company's contractual rights to the cash flows from the financial assets expire or the Company transfers the financial asset to another party without retaining control of substantially all risks and rewards of the asset. A financial liability is derecognised when its contractual obligations are discharged, cancelled, or expire.

Identification and measurement of impairment

The Company conducts a periodic review to identify invested assets having other than temporary impairments. Some of the factors considered in identifying other than temporary impairments include: (1) whether the Company intends to sell the investment or whether it is more likely than not that the Company will be required to sell the investment prior to an anticipated recovery in value; (2) the likelihood of the recoveries in full of the principal and interest (i.e., whether there is a credit loss); (3) the financial condition, near-term and long-term prospects for the issuer, including the relevant industry conditions and trends, and implications of rating agency actions and offering prices.

At each reporting date the Company assesses whether there is objective evidence that financial assets that are not invested assets are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after initial recognition of an asset, and that the loss event has an impact of the future cash flows on the asset that can be estimated reliably.

Notes to the Financial Statements *continued*

2 Significant accounting policies *continued*

Identification and measurement of impairment *continued*

Objective evidence that financial assets are impaired includes observable data that comes to the attention of the Company of any significant financial difficulty of the issuer, or significant changes in the environment in which the issuer operates.

All impairment losses are recognised in full in the profit and loss.

Offsetting

Financial assets and liabilities are set off and the net amount presented in the balance sheet when, and only when, the Company has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Investment return

Interest income is recognised on an accruals basis in the profit and loss account. Realised gains or losses represent the difference between net sales proceeds and purchase price.

Investment income, realised gains and losses and investment expenses and charges are allocated to the general business technical account in full.

Unrealised gains and losses on investments represent the difference between the fair value at the balance sheet date and their purchase price. Movements in unrealised investment gains and losses during the year comprise the increase/decrease in the reporting period in the value of the investments held at the reporting date and the reversal of unrealised investment gains and losses recognised in earlier reporting periods in respect of investment disposals of the current period. Movements in unrealised investment gains and losses are reported in the Statement of Comprehensive Income.

Functional currencies

The functional currency of the Company is Sterling, with the exception of the branch operations in Ireland, Holland, France and Germany, for which the functional currency is Euro.

Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from such transactions and from the retranslation of balance sheet items at the year end exchange rates are recognised in the non-technical account.

For the branches that have a functional currency different to the Sterling presentational currency, the results and financial position are translated into Sterling as follows: Balance sheet items are translated at the closing rate as at the balance sheet date. Profit or loss account items are translated at average monthly exchange rates. All resulting exchange differences are recognised in the Statement of Comprehensive Income.

Deferred tax

Deferred tax is recognised in respect of all timing differences at the reporting date. Timing differences are differences between taxable profits and total comprehensive income as stated in the financial statements that arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is determined using tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or that future taxable profits will be available against which the temporary differences can be utilised.

Notes to the Financial Statements *continued*

3 Use of critical judgements, assumptions and estimates

The preparation of financial statements requires the use of significant judgements, assumptions and estimates. The Directors consider the accounting policies for determining the valuation of insurance liabilities, the valuation of investments and the valuation of the deferred tax asset as being the most critical to an understanding of the Company's result and financial position.

The most critical estimate included within the Company's balance sheet is that in respect of losses incurred but not reported. The total gross estimate within the Company's balance sheet as at 31 December 2018 was £386.0m (2017 £361.2m). Estimates for losses incurred but not reported are continually being re-evaluated based on the Company's claims experience, developments in the broader industry and expectations of changes in future years. There is though an inherent uncertainty in estimating claims provisions at the end of the reporting period for the eventual outcome of outstanding notified claims and in estimating the number and value of claims still to be notified. In particular the estimate of provisions for the ultimate cost of asbestos exposures is subject to significant uncertainties due to the slow emergence and longer settlement period for these claims. There is thus a risk that material adverse changes to claims estimates in future years may have a critical impact on the Company's reported performance and financial position.

Significant assumptions are required in valuing the Company's deferred tax asset. The deferred tax asset relates to carry forward tax losses and is valued using an estimate of future profits by financial year and then applying the latest tax rate which has received Royal Assent and which might reasonably be expected to apply when the timing differences reverse.

The recoverability of the deferred tax asset depends on the availability of future profits. Projected profits of the Company over the three year business planning cycle has been used as the basis for determining the recoverability of this asset, together with the indefinite tax loss carry forward available in the UK.

The deferred tax asset in respect of taxable losses carried forward was £18.9m at 31 December 2018 (2017 £19.9m).

4 Risk and capital management

This section identifies the key risks faced by the Company and the steps taken to manage those risks. The Company's appetite for accepting and managing the varying classes of risk it faces is defined by the Company's Board of Directors. The Board of Directors has established a comprehensive risk management framework that includes a full range of risk policies and risk procedures which include risk identification, risk measurement, risk mitigation, risk reporting and stress and scenario tests to ensure that the risk exposures faced by the Company are appropriately managed.

The principal sources of risk faced by the Company can be classified in the following categories:

- Insurance;
- Credit;
- Market;
- Liquidity;
- Capital management.

Notes to the Financial Statements *continued*

4 Risk and capital management *continued*

Insurance risk

Management of insurance risk

The Underwriting Committee oversees the management of underwriting risk and in particular ensures adherence to the Board determined risk appetite in terms of product, line of business, geographical exposure, line sizes, and rating adequacy. The underwriting strategy includes limits on the Company's total exposure to specific risks, together with limits on geographical and industry exposures. The aim is to ensure a well diversified book is maintained with no over exposure in any one industry, line of business or geographical region. The Underwriting Committee meets quarterly and will address new product ideas, emerging claims issues, product and line of business profitability issues, as well as monitoring the overall portfolio performance.

Contracts can contain a number of features which help to manage the underwriting risk such as the use of deductibles, limits and aggregate caps. The Company uses sophisticated modelling tools to monitor and manage the concentration of exposure from weather events and to ensure they remain within the Board's risk appetite. Authority limits are accorded to individual underwriters based on their experience. The Company also makes use of reinsurance to mitigate the risk of incurring significant losses linked to any one risk or any one event, principally risk excess of loss and property catastrophe reinsurance. Where an individual exposure is in excess of Company's appetite additional facultative reinsurance is also purchased.

On a monthly basis performance reviews are conducted to monitor premium production, business mix, rating adequacy and claims activity relative to targets set out in the Company's annual business plan. On an annual basis each portfolio is subjected to a detailed review to identify actions to be taken to improve performance where necessary and opportunities to further develop the portfolio.

The Finance Committee oversees the management of reserving risk. The Company's in house actuaries perform a reserving analysis on a quarterly basis, liaising closely with underwriters and claims handlers. The use of proprietary and standardised modelling techniques, internal and external benchmarking, and the review of claims development patterns are all instrumental in mitigating reserving risk. The aim of the quarterly reserving analysis is to produce a probability-weighted average of the expected future cash outflows arising from the settlement of incurred claims. These projections include an analysis of claims development compared to the previous 'best estimate' projections.

The Finance Committee performs a comprehensive review of the projections, both gross and net of reinsurance, and following this review makes recommendations to the Company's Board of Directors of the appropriate claims provisions to be established. In arriving at the level of claims provisions carried, a margin is applied over and above the actuarial best estimate so no adverse run-off deviation is envisaged.

Total	191,250	34,433	4,606	230,289

Net loss ratio sensitivity

The following table shows the impact on the Company's post tax result and financial position were the net loss ratio to increase by 1%. This is on the basis that an increase in gross claims incurred would have a similar impact on the reinsurance recovery and the claims handling costs:

	2018	2017
	£000	£000
Total decrease in result after tax and net assets	1,736	1,660

Profit and loss sensitivity to expenses

The following table shows the impact were net operating expenses to increase by 5%:

	2018	2017
	£000	£000
Total decrease in result after tax and net assets	3,784	3,780

Notes to the Financial Statements *continued*

4 Risk and capital management *continued*

Credit risk

Credit risk is the risk of financial loss due to counterparties failing to meet some or all of their obligations. The Company's key areas of exposure to credit risk include:

- counterparty exposures with respect to cash deposits and investments;
- reinsurers' share of technical provisions;
- amounts due from brokers and policyholders.

The Finance Committee oversees the management of credit risk. The Committee is responsible for ensuring that the Board approved credit risk appetite is not exceeded. Limits are placed on exposures to individual bank and investment counterparties, and groups of counterparties, based on the likelihood of default having regard to the credit rating of the underlying counterparty.

The Company's strategy is to purchase reinsurance only from reinsurers who meet the Company's security standards. Reinsurance counterparties are subject to a rigorous internal assessment process by reviewing credit ratings provided by rating agencies and other publicly available financial information. Due to the nature of the reinsurance market, and the restricted range of reinsurers with acceptable credit ratings, the Company is exposed to credit and concentration risk with individual reinsurers and groups of reinsurers.

The Company's exposure to brokers and policyholders is monitored as part of its regular credit control processes. The payment histories of brokers and policyholders are monitored on a monthly basis.

An analysis of the Company's exposure to counterparty credit risk based on Standard and Poor's or equivalent ratings, is set out below:

2018	AAA	AA	A	BBB	Not rated	Total

4 Risk and capital management *continued*

Credit risk *continued*

The largest counterparty exposure within the AAA rating was the European Investment Bank as at 31 December 2018 and 2017. Within the AA rating, the largest counterparty exposure was the UK government as at 31 December 2018 and 2017. With the exception of AAA and AA government debt securities the largest credit exposure does not exceed 5% of the Company's total financial assets. The Company has no holdings in Government bonds of Greece, Italy, Spain or Portugal, nor in any corporate bonds for companies based in those countries.

The largest reinsurance counterparty exposure within the AAA rating both at 31 December 2018 and 2017 was St Paul Fire and Marine Insurance Company. Within the AA rating, the largest reinsurance counterparty at 31 December 2018 was Zurich Insurance Plc (2017 Munich Reinsurance Company).

As at 31 December 2018 and 2017 the Company held no material financial assets that were past due or impaired beyond their reported fair values. For the current and prior periods the Company did not experience any defaults on investments.

As at 31 December 2018 the Company had pledged as collateral to support the capital requirements of fellow subsidiary operations £90m (2017 £27m) of government securities.

An analysis of the carrying amounts of past due or impaired financial assets is presented in the table below:

2018	Within terms	0 - 1 month	2 - 3 months	Over 3 Months	Impairments	Total
	£000	£000	£000	£000	£000	£000
Investments	1,095,642	-	-	-	-	1,095,642
Reinsurance claims outstanding	80,465	-	-	-	-	80,465
Reinsurance debtors	1,001	16	57	1,316	(900)	1,490
Insurance debtors	48,503	3,330	1,416	1,013	(94)	54,168
Other debtors	1,551	-	-	-	-	1,551
Cash at bank and in hand	19,694	-	-	-	-	19,694
Total	1,246,856	3,346	1,473	2,329	(994)	1,253,010

2017	Within terms	0 - 1 month	2 - 3 months	Over 3 Months	Impairments	Total
	£000	£000	£000	£000	£000	£000
Investments	1,065,850	-	-	-	-	1,065,850
Reinsurance claims outstanding	50,115	-	-	-	(1,320)	48,795
Reinsurance debtors	680	31	106	2,987	-	3,804
Insurance debtors	34,849	1,394	1,757	913	(705)	38,208
Other debtors	18,342	-	-	-	-	18,342
Cash at bank and in hand	19,662	-	-	-	-	19,662
Total	1,189,498	1,425	1,863	3,900	(2,025)	1,194,661

The Company's maximum exposure to credit risk is represented by the carrying values of financial assets included in the balance sheet. The Company does not use credit derivatives or other products to mitigate the maximum exposure to credit risk.

Notes to the Financial Statements *continued*

4 Risk and capital management *continued*

Market risk

The Finance Committee oversees the management of market risk. The Company is exposed to the risk of potential losses from adverse movements in market prices, in particular those of interest rates and foreign currency exchange rates. These exposures are controlled by the setting of limits and by asset-liability matching, in terms of both duration and foreign currency composition, in line with the Company's risk appetite.

Interest rate risk

The Company's investment portfolio is comprised exclusively of high quality fixed income government and corporate bonds. The fair value of the investment portfolio is inversely correlated to movement in market interest rates. If market interest rates rise, the fair value of the Company's fixed income investments will fall. The investments typically have relatively short durations and the portfolio is managed to minimise interest rate risk. If market interest rates had risen by 100 basis points as at the balance sheet date the shareholder's equity would have fallen by £24m (2017 £17m) after tax.

Insurance contract liabilities are not directly sensitive to interest rates as they are undiscounted and non-interest bearing.

Currency risk

The Company operates principally in the UK and Ireland. It also has currency exposures to its run-off operations in Holland, France and Germany and to intercompany transactions with its parent company in the United States. Accordingly its net assets are subject to foreign exchange movements between Sterling and the Euro and US dollar. The Company manages these exposures by monitoring them regularly and ensuring its Euro and US dollar assets are broadly matched by Euro and US dollar liabilities respectively, with any surplus net assets held in Sterling.

The Company's shareholder's equity analysed by currency is:

	Pound sterling £000	Euro £000	US dollar £000	Other £000	Total £000
Net assets 31 December 2018	475,290	4,487	(14,424)	(193)	465,160
Net assets 31 December 2017	449,511	2,699	(6,532)	(201)	445,477

The impact of a 10% change in Sterling against Euro and US Dollar at the reporting date would have the following impact on shareholder's equity:

	Increase Sterling/Euro £000	Decrease Sterling/Euro £000	Increase Sterling/ USD £000	Decrease Sterling/USD £000
Increase/(decrease) in net assets 31 December 2018	(417)	510	1,334	(1,631)
Increase/(decrease) in net assets 31 December 2017	(245)	300	594	(726)

Liquidity risk

Liquidity risk is the risk that the Company may be unable to settle its obligations as they fall due as a result of insufficient assets being available in a form that can be readily convertible into cash.

The Finance Committee oversees the management of liquidity risk. The Company's financial assets are held in highly liquid assets that can be readily convertible into cash in a prompt fashion and with minimal expense. The Company has no external debt and has access to the financial support of its financially strong parent company. Cash flow forecasts are prepared and reviewed on a regular basis.

Notes to the Financial Statements *continued*

4 Risk and capital management *continued*

Liquidity risk *continued*

The following table summarises the maturity profile of the Company's insurance liabilities and creditors analysed based on the estimated remaining duration until settlement:

2018	Total	0 - 1 year	2 - 5 years	More than 5 years
	£000	£000	£000	£000
Technical provisions	831,626	372,887	313,486	145,253
Creditors	23,759	23,759	-	-
Total	855,385	396,646	313,486	145,253

2017	Total	0 - 1 year	2 - 5 years	More than 5 years
	£000	£000	£000	£000
Technical provisions	775,008	335,775	309,839	129,394
Creditors	32,338	32,338	-	-
Total	807,346	368,113	309,839	129,394

Capital management

The Company's primary objectives when managing its capital position are as follows:

- to protect its ability to continue as a going concern and thus to protect its policyholders;
- to enable an appropriate return to the group's shareholders by allocating appropriate amounts of capital to its products commensurate with the risks taken;
- to comply with its regulatory capital requirements;
- to maintain a financial strength rating of A.M. Best A++ (superior).

The Company's capital comprises share capital, retained earnings and revaluation reserves. For internal modelling purposes the Company treats its available capital as being its shareholder's equity, less capital pledged to support the capital needs of affiliates. As at 31 December available capital on this basis comprised £375m (2017 £418m). During the year the Company received a £29m capital injection from its parent company, The Travelers Companies, Inc., in return for the issuance of new shares, to support its investment in its new Irish subsidiary Travelers Insurance Designated Activity Company.

The Company is subject to capital requirements imposed by both its regulator and rating agencies. The insurance company capital regime in the UK is on a Solvency II basis. Under this regime the Company's capital requirement is determined using the standard formula. As management sets the target economic capital for the Company, the regulatory and rating agency capital requirements are treated as minimum requirements. In setting its target economic capital and determining capital to allocate to different products the Company employs its internal capital model. At 31 December 2018 the Company's regulatory solvency capital requirement was £279m (2017 £310m), and adjusting for the assets pledged to support affiliate companies' capital requirements at Lloyd's, its coverage ratio was 134.5% (2017 134.8%).

During the year the Company was in full compliance with the capital requirements imposed by its prudential regulator, the Prudential Regulation Authority. There were no changes in the Company's approach to capital risk management during the current or prior year.

The Company's financial strength rating with A.M. Best is A++ (superior).

Notes to the Financial Statements *continued*

5 Continuing and run-off operations

The Company manages the business by separating out the operations in run-off.

In December 2001, the Company ceased writing business in its branch operations in the Netherlands, France and Germany. The Company also ceased writing medical malpractice business in both the United Kingdom and Ireland, and construction business in the United Kingdom. These operations are consequently now in run-off. In addition, the Company ceased to write personal motor and household policies in the United Kingdom on 1 April 1998. In September 2011 the Company ceased writing personal lines business in Ireland. The results of all of the above operations have been disclosed as run-off operations.

The breakdown of the general business technical account between run-off and continuing operations is as follows:

	2018		2017	
	Continuing operations £000	Run-off operations £000	Continuing operations £000	Run-off operations £000

Credit on unrealised losses on investments	(2,598)	(2,801)
Tax credit on other comprehensive loss	(2,707)	(2,783)

(c) Factors affecting the total tax charge for the year

The tax charge for the year is lower than (2017 higher than) the standard rate of corporation tax in the UK:

	2018	2017
	£000	£000
Profit on ordinary activities before tax	4,678	27,907
Tax using the corporation tax rate of 19.0% (2017 19.25%)	889	5,372
Effect of tax rate change	411	(591)
Prior year adjustments - current tax	38	(293)
Prior year adjustments - deferred tax	15	93
Prior year group relief - deferred tax	(567)	1,992
Non-taxable income	(167)	(388)
Other differences	-	3
Total tax charge	619	6,188

As at 31 December 2018 the Company has tax losses carried forward of £109,606,000 (2017 £112,232,000).

The 2015 budget on 8 July 2015 announced that the UK corporation tax rate will reduce to 18% by 2020. There will be a reduction in the rate from 20% to 19%, effective from 1 April 2017 and a further reduction to 18%, effective 1 April 2020. These changes were enacted on 25 November 2015.

The 2016 Budget on 16 March 2016 announced that the UK corporation tax rate will now reduce to 17%, effective 1 April 2020. These changes were enacted on 15 September 2016 and will reduce the Company's future current tax charge accordingly.

15 Investments in Group Undertakings

Travelers Insurance Designated Activity Company (“TIDAC”) is incorporated within the Republic of Ireland and is a wholly owned subsidiary of the Company. The Company injected £5.4m of new capital in return for the issuance of new shares in December 2018. In February 2019 the Company injected a further £26.5m of new capital in return for the issuance of new shares.

The following table gives information on TIDAC as at 31 December 2018:

	2018
	£000
Cost	5,446
Net assets	5,501
Class of shares held	Ordinary

The registered address of TIDAC is 3rd Floor, Europa House, Harcourt Centre, Harcourt Street, Dublin 2, Ireland.

Travelers Professional Risks Limited, a wholly owned subsidiary of the Company, became dormant in 2016 with the only movement in 2017 being the payment of a £434,538 dividend. Travelers Professional Risks Limited had net assets at 31 December 2017 of £nil and on 27 November 2018 was dissolved.

Under the Companies Act 2006 Section 401, for accounting periods beginning on or after 1st January 2005 an exemption from preparing consolidated accounts is available, subject to certain conditions. Following an assessment of these conditions it is considered appropriate for the Company to take advantage of the exemption from preparing consolidated accounts and therefore these financial statements are for the Company only.

(c) Fair value measurement of investments

The Company's estimates of fair value for investments are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the fair value accounting guidance hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest priority is given to unadjusted quoted prices in active markets and the lowest priority to unobservable inputs that reflect the Company's significant market assumptions. The level in the fair value hierarchy within which the fair value measurement is reported is based on the lowest level input that is significant to the measurement of its entirety. The three levels of the hierarchy are as follows:

- Level 1 - The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access the measurement date;
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly;
- Level 3 - Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability and therefore, prices are determined using a valuation technique.

The Company utilised a pricing service to estimate the fair value of its investments at both 31 December 2018 and 31 December 2017.

The fair value of a financial instrument is the estimated amount at which the instrument could be exchanged in an orderly transaction between knowledgeable, unrelated, willing parties, i.e., not in a forced transaction. The estimated fair value of a financial instrument may differ from the amount that could be realised if the security was sold in an immediate sale, e.g. a forced transaction. Additionally, the valuation of investments is more subjective when markets are less liquid due to the lack of market based inputs, which may increase the potential that the estimated fair value of an investment is not reflective of the price at which an actual transaction would occur.

For investments that have quoted market prices in active markets, the Company uses the unadjusted quoted market prices as fair value and includes these prices in the amounts disclosed in Level 1 of the hierarchy. The Company receives the quoted market prices from third party, nationally recognised pricing services. When quoted market prices are unavailable, the Company utilises these pricing services to determine an estimate of fair value based on recent transactions for identical assets. The fair value estimates provided from these pricing services are included in the amount disclosed in Level 2 of the hierarchy. If quoted market prices and an estimate from a pricing service are unavailable, the Company produces an estimate of fair value based on internally developed valuation techniques, which, depending on the level of observable market inputs, will render the fair value estimate as Level 2 or Level 3. The Company bases all of its estimates of fair value for assets on the bid price as it represents what a third party market participant would be willing to pay in an arm's length transaction.

The following table present the level within the fair value hierarchy at which the Company's investments are categorised.

	Level 1	Level 2	Level 3	Total
	£000	£000	£000	£000
Financial assets as at 31 December 2018	-	1,095,642	-	1,095,642
Financial assets as at 31 December 2017	-	1,065,850	-	1,065,850

27 Related party transactions

As the Company is a wholly owned subsidiary of The Travelers Companies, Inc., it has taken advantage of the exemptions in FRS 102.33.1A not to disclose transactions or balances with other group entities which qualify as related parties.

Other than directors' remuneration, which is disclosed in note 13, there are no other related party transactions that require disclosure.

28 Commitments and Contingent Liabilities

In the normal course of business, letters of credit to the value of £58,851 (2017 £55,822) have been issued to fiscal authorities against insurance tax liabilities. These are secured against bank deposits.

The Company has also guaranteed the lease commitments of an affiliated company relating to one of its main operating premises in the United Kingdom. The commitment was £484,983 for 2018 and £738,206 per annum thereafter, expiring in 2027.

Acting as a third party depositor under a trust deed executed in 2013, the Company has deposited £90m (2017 £27m) in fixed income securities with Lloyd's as security for the underwriting activities of its affiliate companies, Aprilgrange Limited and F&G UK Underwriters Limited. The fees attaching to this security earned by the Company were £0.4m (2017 £0.4m).

Notes to the Financial Statements *continued*

28 Commitments and Contingent Liabilities *continued*

Travelers has a pension scheme in the UK providing benefits based on final pensionable pay. This scheme was closed with effect from 1 April 2003. Travelers Management Limited currently bears responsibility for meeting any funding requirements of this scheme. In the event that Travelers Management Limited was not able to fulfil its obligations this responsibility would fall to the Company. The updated valuation for FRS 102 as at 31 December 2018 identified a deficit of £2,138,000 (2017 - deficit of £3,264,000).

29 Immediate and ultimate parent company

The immediate and ultimate parent undertaking of the Company is The Travelers Companies, Inc., a company registered in the United States. Copies of The Travelers Companies, Inc. accounts can be obtained from the Company's registered office, 23-27 Alie Street, London E1 8DS, or the Company's website: www.travelers.co.uk.

30 Affiliate company guarantee

All obligations and liabilities of the Company arising from the Company's past or future underwriting activities are guaranteed unconditionally by St. Paul Fire & Marine Insurance Company, one of the principal insurance subsidiaries of The Travelers Companies, Inc.. The guarantee is terminable by the guarantor on twelve months' notice, but termination would, by the terms of the guarantee, be of no effect in respect of business underwritten prior to the date of termination.

31 Post balance sheet events

Subsequent to the year end, on 11 February 2019, the Company made a further capital injection of £26.5m into TIDAC in return for the issuance of new €1 ordinary shares.

On 28 February 2019 all of the business of Travelers Casualty and Surety Company of Europe Limited was transferred to the Company via a business transfer scheme under Part VII of the Financial Services and Markets Act 2000. The business transferred is 100% reinsured with other Travelers group companies. The gross reserves transferred amounted to \$59.7m.

Independent auditor's report to the members of Travelers Insurance Company Limited

1. Our opinion is unmodified

We have audited the financial statements of Travelers Insurance Company Limited ("the Company") for the year ended 31 December 2018 which comprise the profit and loss account: technical account – general business, profit and loss account: non-technical account, statement of comprehensive (loss)/income, statement of changes in equity, balance sheet and the related notes, including the accounting policies in note 2.

In our opinion the financial statements:

- give a true and fair view of the state of Company's affairs as at 31 December 2018 and of its profit for the year then ended;
- have been properly prepared in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and Financial Reporting Standard 103 Insurance Contracts; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were first appointed as auditor by the Company before 1990. The period of total uninterrupted engagement is for more than the 28 financial years ended 31 December 2018.

We have fulfilled our ethical responsibilities under, and we remain independent of the Company in accordance with, UK ethical requirements including the FRC Ethical Standard as applied to public interest entities. No non-audit services prohibited by that standard were provided.

Overview

2. Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. We summarise below the key audit matter identified (unchanged from 2017), in arriving at our audit opinion above, together with our key audit procedures to address the matter and, as required for public interest entities, our results from those procedures. These matters were addressed, and our results are based on procedures undertaken, in the context of, and solely for the purpose of, our audit of the financial statements as a whole, and in forming our opinion thereon, and consequently are incidental to that opinion, and we do not provide a separate opinion on these matters.

	The risk	Our response
<p>Valuation of claims outstanding</p> <p>(£683.7 million gross, £603.2 million net; 2017: £651.0 million gross, £602.2 million net)</p> <p>Refer to page 17 Audit Committee Report dated 1 March 2019, page 14 of the financial statements for the accounting policy) and pages 34 to 36 of the financial statements for the financial disclosures.</p>	<p>Subjective valuation</p> <p>Claims outstanding represent the largest risk for the Company. Valuation of these liabilities is highly judgemental because it requires a number of assumptions to be made with high estimation uncertainty such as expected loss ratios, estimates of the frequency and severity of claims by territory and line of business.</p> <p>Certain lines of business have greater inherent uncertainty, for example those where claims emerge more slowly over time, or where there is greater variability in claim settlement amounts, for example. asbestos related claims.</p> <p>The determination and application of the methodology and performance of the calculations are also complex and require the use of actuarial experts.</p> <p>A margin is added to the actuarial best estimate of claims outstanding to make allowance for specific risks identified in assessment of the best estimate. The appropriate margin to recognise is a subjective judgement and estimate taken by the Directors, based on the perceived uncertainty and potential for volatility in the underlying claims.</p> <p>The appropriateness of the calculations rely on the integrity of the underlying data, which is sourced from a number of systems which is subject to regular reconciliations.</p> <p>The effect of these matters is that, as part of our risk assessment, we determined that the valuation of claims outstanding has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole. The financial statements note 22 disclose the level estimated by the Company.</p>	<p>With the assistance of our actuarial specialist, we performed the following:</p> <p>Control design and observation Evaluation of the governance around the overall reserving process, including the scrutiny applied by reserving committee.</p> <p>Assessing valuer's credentials We assess the qualifications and experience of those responsible and examined the output of the reviews to assess the scope and depth of these processes.</p> <p>Control observation and operation Evaluation and testing of key controls designed to ensure the integrity of the data used in the actuarial reserving process (including both current and prior year case reserve data). We tested controls through inspecting or re-performing the reconciliations.</p> <p>Sector experience and Benchmarking Comparison of assumptions, reserving methodologies and estimates of losses to expectations based on historical experience, current trends and benchmarking to our own industry knowledge.</p> <p>Independent re-performance Independent re-projection of the reserve balances for certain classes of business. The determination of which classes to re-project was based on risk assessment and consideration of the evidence available from other alternative data analysis procedures. We have projected 60% of the estimated reserves and peer reviewed 20% of the Company's portfolio.</p> <p>Sensitivity analysis In respect of the Company's exposures in relation to UK Asbestos, we challenged the Company's estimate of losses by performing sensitivity analysis over key judgements and assumptions.</p> <p>Margin evaluation Evaluation of the appropriateness of the margin to be applied to the actuarial best estimate. In particular we considered the allowance for uncertainties inherent in the data and assumptions in developing the actuarial best estimate.</p> <p>Our results Based on the work performed, we conclude that the valuation of the claims outstanding to be within our acceptable range.</p>

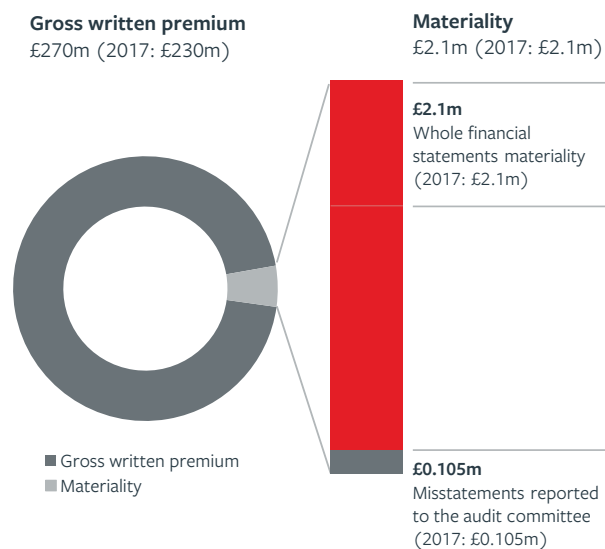

Independent auditor's report to the members of Travelers Insurance Company Limited *continued*

3. Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at £2.1 million (2017: £2.1 million), determined with reference to a benchmark of gross written premium, of which it represents 0.8%% (2017: 0.9%).

We agreed to report to the Audit Committee any corrected or uncorrected identified misstatements exceeding £105,000 (2017: £105,000), in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit of the Company was undertaken to the materiality level specified above and was performed at the Company's offices in Redhill and London other than procedures in relation to investments and IT general controls for the general ledger which were centrally performed by the auditor of the Company's parent entity, The Travelers Companies Inc. in United States. We instructed the parent entity's auditor to perform procedures over investments and the general ledger. We held telephone conference meetings with them and discussed the work performed and their findings to ensure the risks relevant to our audit are addressed.

4. We have nothing to report on going concern

The Directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or to cease its operations, and as they have concluded that the Company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over its ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

Our responsibility is to conclude on the appropriateness of the Directors' conclusions and, had there been a material uncertainty related to going concern, to make reference to that in this audit report. However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the absence of reference to a material uncertainty in this auditor's report is not a guarantee that the Company will continue in operation.

In our evaluation of the Directors' conclusions, we considered the inherent risks to the Company's business model, including the impact of Brexit, and analysed how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. We evaluated those risks and concluded that they were not significant enough to require us to perform additional audit procedures.

Based on this work, we are required to report to you if we have concluded that the use of the going concern basis of accounting is inappropriate or there is an undisclosed material uncertainty that may cast significant doubt over the use of that basis for a period of at least a year from the date of approval of the financial statements.

We have nothing to report in these respects, and we did not identify going concern as a key audit matter.

Independent auditor's report to the members of Travelers Insurance Company Limited *continued*

5. We have nothing to report on the strategic report and the Directors' report

The Directors are responsible for the strategic report and the Directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the Directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in those reports;
- in our opinion the information given in the strategic report and the Directors' report for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

6. We have nothing to report on the other matters on which we are required to report by exception

Under the Companies Act 2006, we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

7. Respective responsibilities

Directors' responsibilities

As explained more fully in their statement set out on page 6, the Directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern; disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or other irregularities (see below), or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud, other irregularities or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

Irregularities – ability to detect

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience, through discussion with the Directors and other management (as required by auditing standards), inspection of the Company's regulatory and legal correspondence and understanding of the Company's policies and procedures regarding compliance with laws and regulations. We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation, taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Independent auditor's report to the members of Travelers Insurance Company Limited *continued*

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation or the loss of Company's licence to operate. We identified the following areas as those most likely to have such an effect: identified Prudential Regulatory Authority - capital and liquidity regulations recognising the financial and regulated nature of the Company's activities and its legal form. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Directors and other management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it. In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

8. The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.
